

Visa Cross-Border Solutions

Unlock the next generation of money movement

With real-time payment rails providing businesses and consumers on-the-spot domestic payments across more than 72% of the world¹, applying the same to international payments is the next expectation.

While international payments, in many cases, remain slow, opaque, and costly, Visa has made it easier to transact and expand globally with its latest cross-border multi-currency account solutions. Address your customers' growing demands and bring transparency, cost efficiency, and security to moving money across borders.

Visa Cross-Border Solutions help issuers to leap past transformation issues, creating innovative customer experiences for the next generation of customers with simple integration and maximum opportunity.

Transcend borders effortlessly

Innovations to help you go global

Our cloud-native platform puts the power of global money movement in your hands - making it easy for your customers to collect, hold, convert and send and spend money in multiple currencies.

We get you there faster

Our global reach and modular approach can make it easier for you to get your products in the hands of your customers quickly and help them send and spend money in 180+ territories.

Empowering you to achieve more

We are driven to serve you, our customers, providing you with tailored solutions so you can have the scalable, borderless business that you've always wanted.

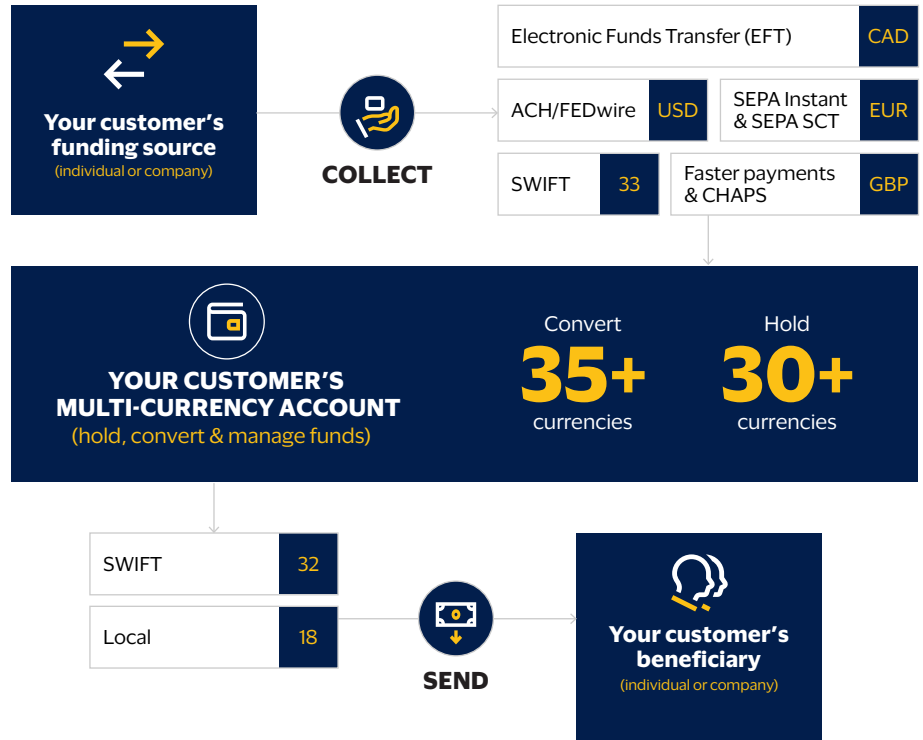

Trust, embedded in every transaction

We provide the enterprise-level security necessary for your expansion in the global market and assist you in managing the challenges of compliance and regulatory requirements.

Provide great customer experiences with our modular APIs

Payments are received and paid out via SWIFT and domestic routes; they are automated, fast, and reliable to more than 180 countries and territories.

Reconciliation is made easy by combining the ability to issue customers with unique IBANs and named accounts, end-user notifications and transparent tracking and reporting capabilities.

Put the power of money movement in your customers' hands

Visa Cross-Border Solutions offer issuers the tools to create their own sophisticated app or web-based experiences that connect consumers and businesses around the world.

Through our account solutions issuers like eToro, Standard Bank and Revolut are capturing new and fast-growing global revenue streams via a single API integration.

Benefits for your customers (individuals or companies)

Seamless 24/7

Integration between account management and real-time FX trading ensures a frictionless journey. There is also the option to book forward or SPOT contracts to lock in pricing for up to 12 months.

Visibility

Most transactions complete in seconds or minutes. However, even if it takes longer, customers can see where their money is and when it will arrive.

Transparency

Before transactions are launched customers can see the fees, the exchange rate and the amount of funds which will arrive.
